To Whom It May Concern,

Our team at Camping World of Lakeville Mn would like to recommend anyone that wants the best for their team to take a few minutes and sit down and take a look at what Tyler Hardy and Alicia Billock with Family Heritage have to offer. Tyler and Alicia came to our location in Lakeville back in March of 2024. Tyler and Alicia met with each interested staff member and went through the details to ensure the options were a good fit for their personal circumstances. Their no pressure and educational approach shows that they care more about educating individuals on their products and allowing the individual to make the best decision for themselves goes a long way.

Things we like about Tyler, Alicia and Family Heritage

1. Local agents who are there when you need them.
2. The company gives you all of your unused premiums back after 20 years so you're not wasting your money if you don't need to use the policy.
3. We get the opportunity to put a backup plan in place. Most of us had never even thought about things like this until Tyler and Alicia came in.
4. Their services are completely free to the company.
5. No paperwork or payroll deductions to mess with. They work with everyone individually.
6. They sit with each person who wants to sit down and help them figure out which plan is best for them and their family.
7. They are never push or made employees feel like they had to get something.

In conclusion, allowing your staff the opportunity to meet with Tyler and Alicia is an opportunity for you to support your staff at no cost to you. It ensures your people are aware of and exposed to the options that are available to them in the planning and protecting of their families.
